RE: The Brittany

*PRIV -
FYI -
this is what I
provided Edward
- B.*

As of today, we have 1 subscriber at the Brittany, of 8 residents who have moved in. As far as we know, these are rent-subsidized tenants. Six others are scheduled to move in over the next couple of days.

After working at the building, we're concerned that a key person in The Brittany operation may not be giving Liberty 100% cooperation. She worked with Liberty Telephone at The Lucerne, where service was less than perfect, and it seems she's associating her experience then with Liberty Cable today.

When new tenants move in, they must see Millie Seif to get their keys, info on ConEd, telephone, and cable TV she asserts that she gives out info on both cable services, and goes as far as to say "Liberty is cheaper." I question this, though, given we don't have more customers among a clientele where low price would be most important.

Millie further claims that we were delayed in getting our system operational and that she did not receive marketing materials in time. While there were minor delays on both accounts due to a delayed contract execution, tenants didn't move in until the 16th.

Finally, Millie won't provide any lists of new move-ins. She is upset that we knocked on doors over the weekend in an attempt to install new subs.

How can we get Millie's support?

94 Civ. 8886 (LAP)

AFFIDAVIT OF
BEHROOZ NOURAIN

STATE OF NEW YORK)
) ss.:
COUNTY OF NEW YORK)

BEHROOZ NOURAIN, being duly sworn, deposes and states that:

1. I am the Director of Engineering of Plaintiff Liberty Cable Company, Inc. ("Liberty") and am responsible for the installation and operation of Liberty's 18 ghz microwave system.
2. I have reviewed the Affidavit of Roosevelt Mikhail sworn to January 30, 1995 (the "Mikhail Affidavit"). Mr. Mikhail's description of how Liberty's 18 ghz microwave system does and could operate is inaccurate, incomplete and demonstrates an ignorance of how 18 ghz microwave technology is designed and deployed. For example, and not by way of limitation, Mr. Mikhail is completely wrong about the cost and profitability of 18 ghz transmission equipment, the ability to "split" the signal and that "Liberty can technically serve practically any apartment building" with 18 ghz microwave technology. He is wrong in his suggestion that Liberty could install 18 ghz microwave transmission equipment wherever there is an available clear line of sight but refuses to do so only because of the expense. The selection of 18 ghz transmission sites is a very painstaking and difficult process which must take into account not only the availability of a clear line of sight and the cost of the equipment, but also preexisting microwave interference, signal degradation over distance and the ability to obtain permission from building owners to place 18 ghz transmission equipment on their building.
3. Mr. Mikhail claims -- misleadingly -- that "if Liberty cannot currently obtain a clear line of sight to a desired destination from an existing transmitter, it can obtain a

clear line of sight from another rooftop or other location, access to which it can negotiate." See Mikhail Affidavit at ¶ 7. Liberty must have a clear line of sight between its 18 ghz transmission and receiving equipment for the equipment to work. Liberty also needs the permission of the building owner to put its 18 ghz transmission equipment on the building. Liberty can always "negotiate" for that permission. But there is absolutely no assurance that, notwithstanding such negotiations, Liberty can actually get the building owner's permission to install its 18 ghz transmission equipment at a building or a particular site on a building that would give a clear line of sight to 60 Sutton Place South or any other Non-Common System.

4. Mr. Mikhail claims -- incorrectly -- that "Liberty can use a transmitter at its existing transmission site on River Towers (420 East 54th Street), which building is adjacent to 60 Sutton Place South and taller than it, to send a radio signal to that building. A transmitting antenna could be installed closer to the edge of the River Tower roof looking down on 60 Sutton Place South." Mikhail Affidavit at ¶ 4. Liberty has installed and currently operates 18 ghz transmission equipment on River Towers. Liberty's 18 ghz transmission equipment is installed on River Towers pursuant to a license agreement with the building owner. That license agreement precludes Liberty from placing any 18 ghz transmission on River Towers at a site that would permit transmission to 60 Sutton Place South. Liberty needs the permission of the owner of River Towers to install such 18 ghz transmission equipment and there is no assurance Liberty could obtain that permission.

5. I am advised that Time Warner has opposed Liberty's pending application to the Federal Communications Commission for various 18 ghz microwave licenses. If the Federal Communications Commission, at the request of Time Warner, denies Liberty the

requested licenses, then Liberty will not be able to legally deliver its signal to 60 Sutton Place South by microwave. In the absence of 18 ghz licenses, the only way Liberty can deliver its signal to 60 Sutton Place South is by coaxial cable.

6. Some of the Defendants have suggested that Liberty is monopolizing all of the available 18 ghz microwave spectrum for its operations. That is not true. An 18 ghz microwave transmission is a point-to-point transmission that occupies only the space between the transmitter and receiver. Thus, it is possible for virtually unlimited other licensees to use the same frequency at the same time at other locations so long as there is no technical signal interference. For example, it would be possible for a single building to receive microwave transmissions from competing MVPDs simultaneously, so long as it had separate microwave reception antennas for each such transmission and there is no signal interference. As a consequence, Liberty's use of 18 ghz microwave technology does not preclude anyone else from also using that same technology at the same time and it does not preclude competing MVPDs from using their own 18 ghz microwave transmissions to serve subscribers in buildings also served by Liberty.

BEHROOZ NOURAIN

Sworn to before me this
21st day of February, 1995.
